## Summer programs

Summer is an ideal time for your student to have intensive, enriched experiences that will provide a foundation for next years academic challenges.

These programs are designed for young adults to read at or above their grade level and provide the learning skills they need to graduate high school successfully. Our schedule selection provides a way to customize the summer learning experience for your students while providing flexibility in scheduling vacations and other summer activities.

Since 1996, the mission of the Center for Communication Skills has been to enhance the quality of life by improving communication in those we serve. Our core values stem from our certainty that each person is capable of learning and that learning is most effective when it is in a fun and appropriately challenging environment.

6	7	8	9	10
13	14	15	16	17
20	21	22	23	24
27	28	29	30	31

## Summer program options

This software is a series of fun, computer-based exercises for adolescents who need to develop the cognitive skills necessary to become better readers. Lessons are administered as space-based mini-games, such as Lunar Leap and Meteor Ball.

*Fast ForWord to Literacy Advanced* software builds memory, improves concentration, develops a greater learning capacity, and increases auditory, visual, and linguistic processing.

**\*Social skills group** This class focuses on developing relationships, confidence, self-esteem, life skills, and time management. Social skills groups start with basic skills like being aware of body language and facial expressions, and move to more advanced skills such as attentiveness to conversation and maintaining friendships.

This is a one-on-one tutoring program designed to help students of any age improve their spelling, reading, and writing skills. *Barton* is designed to help readers who struggle with dyslexia or other learning disabilities. Once the student can read and spell at the ninth-grade level, they can read well enough to understand college textbooks.

**\*Literature group** This class focuses on critical thinking skills necessary to absorb and enjoy reading. Each week's reading will have a different theme, such as space or sports. A trained therapist will lead the class in discussion and choose books appropriate to the reading level and age of the group members.

## Times and tuition
