

## California Learning Connection

### Scheduling...

Summer can be scheduled by the week between June and August. Let us recommend programs that will match ability and interests while providing the maximum amount of brain boosting and learning.

### Who We Are...

- We are a group of Occupational Therapists, Speech Therapists and Educators.
- We are professionals with extensive professional backgrounds who choose to work in a private practice setting.
- We are specialists in helping young people learn.

Our approach is creative and dynamic while blending elements that accelerate intellectual growth and stimulate learning.

# California Learning Connection

**Individual &  
Group Sessions  
Combining Brain  
Fitness & Academic  
Accelerators**

June - August

## Academic Accelerators

Our programs have a high rate of success and are designed to present academic material in a multisensory systematic manner. The programs are effective with all types of learners and are specifically created to present lessons in a manner that insures that concepts are learned well before moving to the next level. Our results are consistent and have helped thousands of learners succeed.

**Barton Reading and Spelling®** - wonderful for beginning readers and those struggling due to Dyslexia or other learning disabilities.

**Reading A-Z®** - a leveled reading program aligned with state reading standards.

**Writing A-Z®** - a leveled writing program aligned with state standards.

**Visualizing/Verbalizing®** - a program designed to enhance comprehension and thinking skills.

**Math You See®** - a multisensory math program with real-life applications.

## Brian Fitness

We use Gold Standard research-based programs from Scientific Learning to give each learner a boost in brain power. The programs work well by themselves or in tandem with our specialized academic programs.

By combining the programs in a 30 day summer series of we can maximize results and give your child an elevated base for learning in the coming year.

The program develops thinking skills, such as:

- Memory
- Attention
- Processing Speed
- Sequencing Skills
- Reading and Math Skills

## Specialized Summer Camps

**Social Skills Development** - for children with social-interaction problems.

**Handwriting Without Tears®** - two weeks - for children 5-12 who struggle fine motor skills for handwriting.

**Apraxia Camp** - three weeks - for children 5-14 with moderate to severe verbal Apraxia based on a Kaufman research model and neuroscience training. (90 min. per day)

**Intensive Therapy** - Children with speech or language needs can receive therapy a minimum of three times per week for more intensive intervention and accelerated progress.

**A-KID-emic Think Tank** - three weeks - for children 4-7 years old to build learning and social skills.
